

Expand MonitorWall

A monitor wall for presentations and competitions

With a free-standing monitor wall you can easily show a digital presentation or host competitions while communicating your brand on the wall's large exposure area. If you choose double-sided print (otherwise black fabric on the back), you have one side with a undisrupted communication area and one side with a small hole for the monitor.

This Expand GrandFabric wall (same as our exhibition system) consists of an aluminium frame that you cover with a pillowcase fabric. The monitor wall is available in both straight and curved forms in a variety of sizes.

Display your message – on the screen and the fabric

- Stable and durable, also with a large monitor attached
- Easy to set up - no tools needed
- Spotlight available as an accessory
- Easy transport – fits in the Expand PodiumCase transport box

Maximum weight for the monitor and accessories

Weight: 15 kg (monitor placed in 175 cm height)

Extra long feet for stability

The wall comes with extra long feet to ensure stability when the monitor is in place. It can be used with different types of monitors of any size.

Intergrated Monitor Holder

The monitor holder supports VESA for 75, 100, 200, which is standard for most displays.
